How To Order From This Catalog

Order by catalog number and color, using complete number given for each item. Tape catalog numbers contain coding for size and color.

Example:

Catalog number 2520T Red. Catalog number means the following: 25 = 1/4", 20 = pattern, T = transparent, and red is the color desired.

NOTE: Black will be sent if color is not specified.

CODE DEFINITION/TAPES

PRE-FIX

OR SUFFIX

O	Opaque
T or TL	Transparent Tape
TC	Transparent Color Tape
M	Matte Surface Tapes
CP	Crepe Paper Tape (Black)
P	Ruby Red Translucent Paklon
G	Newspaper Type Point Sizes
TS	Terminal Connector Strips

TEMPLATES

C	Chair (1 size)
D	Desk (5 sizes)
F	Legal File (2 sizes)
T	Table (6 sizes)
U	Utility (2 sizes)
BC	Bookcase (1 size)
BS	Book Shelving (1 size)
CB	Cabinet (1 size)
FC	Forms Cabinet (1 size)
CR	Coat Rack (2 sizes)
DT	Drafting Table (2 sizes)
EB	Electronics Bench (1 size)
FF	Flat File (2 sizes)
PDL	Pedestal Desk, Chair (Left)
PDR	Pedestal Desk, Chair (Right)
SU	Shelving Unit (1 size)
WB	Work Bench (1 size)
CA	Credenza (1 size)

SYMBOLS

S	Symbols ("Picto-Pak")
DP	Data Processing
FS	Forms Symbols
PCS	PERT Circles (Sheets)
PF	PERT Flags
PCR	PERT Circles (Rolls)
PRR	PERT Rectangle (Rolls)
POR	PERT Ovals (Rolls)
PHR	PERT Hexagons (Rolls)
TP or TPS	Trans-Pak Symbols

PLANNING BOARDS

TBL	Non-reproducible — Blue Grid
TBK	Reproducible — Black Grid
TBO	Reproducible — Orange Grid
PG	Precision Grids — Blue or Black
TMBK	Reproducible — Metric Black Grid
TMBL	Non-reproducible — Metric Blue Grid

LETTERING

SL	Spaced Lettering
----	------------------

ACCESSORIES

PW	Correction paper (2 sizes)
U — O	Opaque Template Sheets
U — T	Transparent Template Sheets
CT	Clear Tak
MT	Matte Tak

In the preparation and presentation of material for drafting and visual communication, Chart-Pak Tapes and pressure-sensitive components are completely practical and totally effective. Quality results are achieved time and again in any of a number of uses for these pressure-sensitive materials. Consider the advantages of Chart-Pak pressure-sensitive products in the preparation and presentation of all your drafting and visual communication projects.

Less Time On Technique — More Time For Thought

Save your valuable time for creative planning. Tape in solid areas, cross-hatching, repetitive patterns and symbols, shading, fine and bold lines. No ink or pencil necessary. Just press the tape into position. Heat resistant pressure-sensitive adhesive holds the tape down until you remove it. Chart-Pak pressure-sensitive products reproduce crisp and clear through the diazo and/or photographic process.

Consistent Accuracy And Uniformity

Use your skill for the planning. Chart-Pak Tapes are precision-slit to assure permanent accuracy and uniformity in detail work. Won't stretch or shrink. Adhesive backing is heat-resistant. And if there is a special need for a

pre-printed pressure-sensitive product, ask your Chart-Pak dealer for technical information on solving your repetitive drawing problem.

Revisions, Additions And Deletions Without Redrawing

Update outdated projects. Correct new work. Chart-Pak Tapes eliminate re-makes, are made to take changes. Lift off cleanly. Won't tear layout material or leave adhesive deposits. Greater storage life for your projects, too. Tapes won't peel. Colors are fadeproof.

Immediate Understanding

Know that every point of your presentation will be grasped quickly. Present your ideas with clarity, interest and visibility. Time, effort and choice of materials are problems that versatile Chart-Pak Tapes solve from the beginning of a visual communication project to the finishing touches. Whatever the visual form — direct presentation, reproduction or projection — Chart-Pak offers an unlimited selection of materials. Gloss, Matte and Transparent Tapes in as many as 16 colors. Sizes from 1/64" to 2". Numerous patterns, symbols, templates, borders . . . or special pre-printed designs and precision-slit widths.

CHART-PAK PROCEDURE FOR PREPARING CHARTS

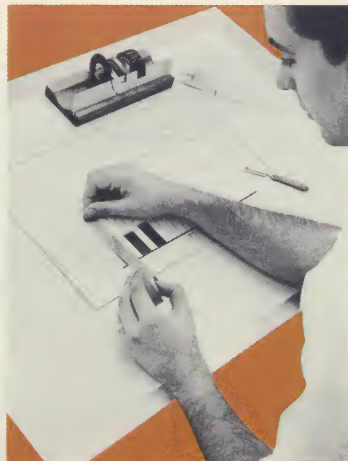

1. Sketch a light pencil layout of your chart or graph on opaque or translucent planning board. Indicate all data copy and data points. Upon completion of pencil layout, check work against worksheet. Determine type of materials to be used. (Transparent or opaque.)

2. Assemble necessary materials: appropriate tapes and symbols, spaced lettering sheets, tape cutter and "Tape-Pen" (where applicable).

3. Connect all data points with selected solid color and/or pattern tapes. To apply tape, unroll a short length. Place end approximately one inch ahead of starting point. Continue to lay tape beyond the desired length. Avoid stretching by simply pressing tape into position.

4. To cut tape, place Chart-Pak Tape Cutter at desired cut-off point. Pull diagonally (45°) against beveled edge of Tape Cutter. Apply pressure to cutter to avoid slippage.

The Chart

The function of a chart is to translate statistical data into visual form.

Data presented graphically eliminates reading of endless figures and makes relationships easier to comprehend. A chart simplifies data presentation. Simplicity, then, must be the essential consideration in making a chart.

GUIDES TO EFFECTIVE SIMPLICITY

CONVEY ONE IDEA One chart — one idea. Don't expect a single chart to do the work of many.

MAKE IT GRAPHIC The graphic elements must make the point. Limit the functions of legends and titles to identification.

USE COLOR JUDICIOUSLY For emphasis, visibility and representation. Color completes the communication.

EDIT COMPLETELY Eliminate unnecessary rules, scale figures, words. Abbreviate when necessary. Use round numbers. Avoid reference keys if possible.

BASIC USES FOR CHARTS

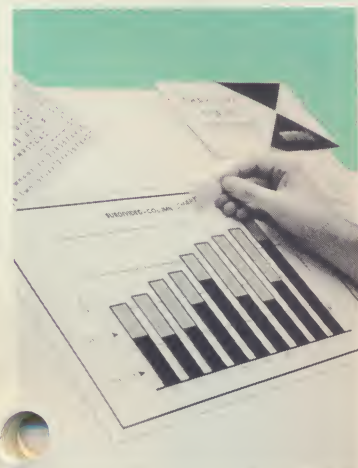

The first consideration is to determine where and how the chart is to be used. The end use of a chart helps determine the type of chart best suited to the requirements. Knowing this, the appropriate Chart-Pak materials can be selected. Here are six basic uses for statistical charts:

- *Publication in Mass Media*
- *Internal Distribution*
- *Confidential Use*
- *Small Groups — presentation*
- *Large Audiences — presentation*
- *Exhibits*

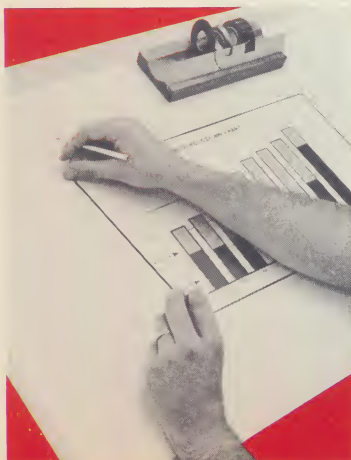

Charts made for each of these categories have special requirements such as:

- Type Size • Bar and Line Weight • Color vs. Black and White • Method of Reproduction (opaque or transparent material)

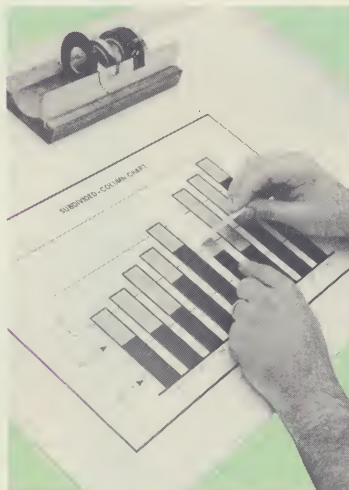

5. Affix data copy to grid sheet. Data copy — numbers, titles, reference information, etc. — may be typed on pressure-sensitive ledger paper (p. 40) or prepared from Chart-Pak Spaced Lettering sheets (p. 11).

6. Enclose graphs, bars and reference tables with solid color "Curve-Line" tapes for professional finishing touches. Erase any traces of pencil with artgum. Make final check. Revise or Correct.

7. To remove tape, carefully peel it off at a 45° angle. This method will free the tape from the layout material without leaving adhesive deposits or tearing the base material. All Chart-Pak pressure-sensitive products reproduce crisp and clear through the diazo and/or photographic process.

"Tape-Saver" Dispenser Only Chart-Pak Has It!

Every tape in Chart-Pak's line — from 1/64" to 2" — is protected by a transparent plastic package from which the tape is dispensed for easier use.

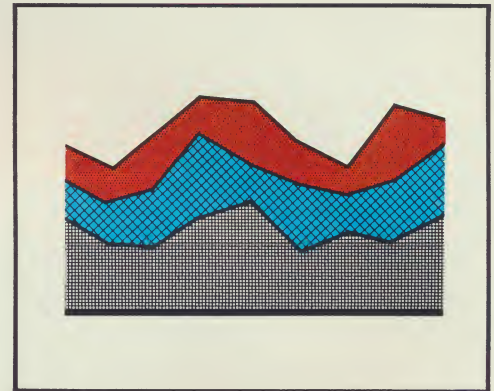

- Protects tape from being crushed or marred, from dirt, dust, and stains.
- Identifies tape size, color and pattern at a glance.
- Ends always accessible, ready to use.
- Easily stored in stack or on spindles.

■ SURFACE CURVE CHART

For showing differentiation of trends, amounts and results over a period of time. A dramatic variation of the basic line chart, it is also good for emphasizing one significant time, in a time series. Three curves can be shown if the lines do not cross. Chart-Pak "Curve-Line" Tapes make the narrow lines, and "Contak" Film, available in a multitude of shading patterns and 27 Contak Color Tints, create the areas between the lines.

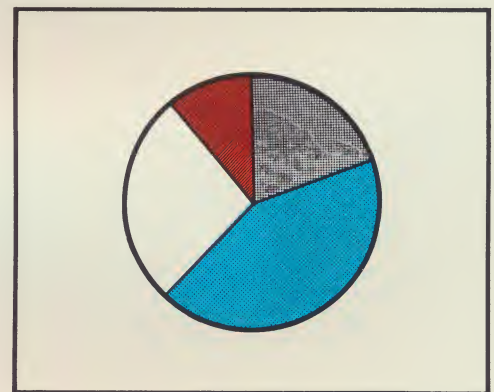

VARIATIONS: Staircase Surface, Cumulative Surface, Line and Surface.

■ PIE CHART

For showing divisions of a whole. The point of the chart should be immediately obvious. Unless the chart's purpose is to emphasize one sector, divisions of the circle should be few. Chart-Pak Tape Pen and Beam Compass attachment make perfect circles with tape. Shading should be light, and contrasts limited. Chart-Pak's varied selection of 27 Contak Color Tints and a wide variety of patterns in Contak Shading Film offers many compatible combinations.

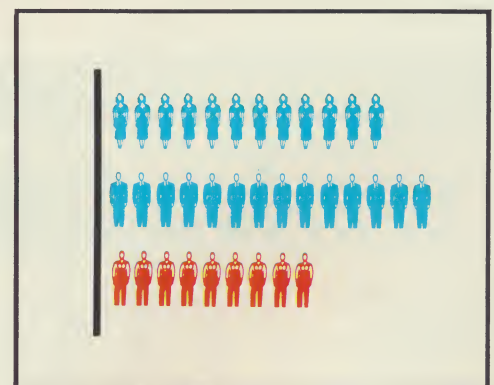

VARIATIONS: Double Pie, Miniature Pie, Satellite Pie, Segment Analysis Pie.

■ PICTORIAL CHART

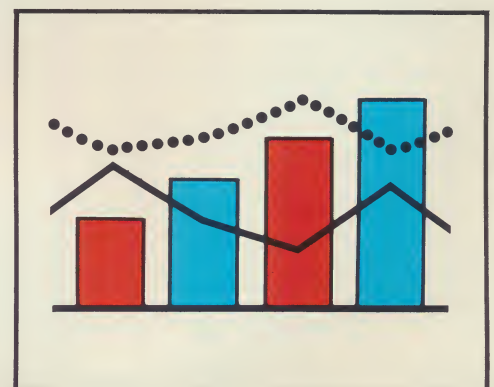

For showing simple comparisons of relationship symbolically. Statistical facts are presented this way when attention and interest must be attracted — as in newspapers and magazines. Symbols usually represent subject and quantity. Chart-Pak "Picto-Pak" and Trans-Pak die cut symbols contain many representative configurations in various sizes and base materials.

VARIATIONS: Bar and Picture, Column and Picture.

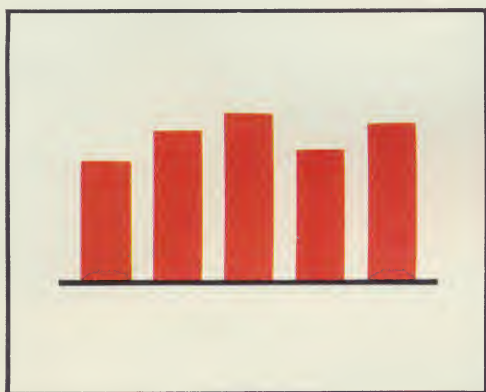

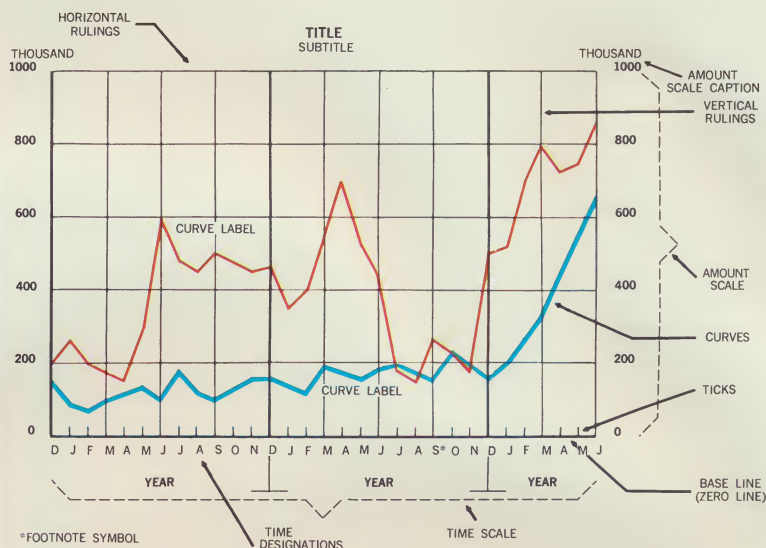

■ COMBINATION CHART

For combining the purposes of more than one chart. A combination of two, usually trend lines and column comparisons, is most effective. Simplicity is especially important because more than one point must be conveyed. Overlays are helpful. Chart-Pak Transparent Color Tapes are essential aids because they do not obscure material underneath and add "instant color" to your presentation.

BASIC CHART FORMS

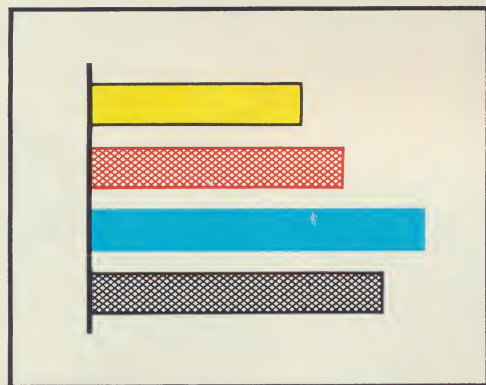

Prepared for
Visual Communications
with Chart-Pak Tapes

■ COLUMN CHART

For comparing a given item at different points in time. Emphasizes total magnitudes in a single series of data. Effectively supplants curve line charts when amounts rather than trends are important. Use a variety of color and pattern tapes to distinguish multi-segmented columns, when comparing the components that determine the whole.

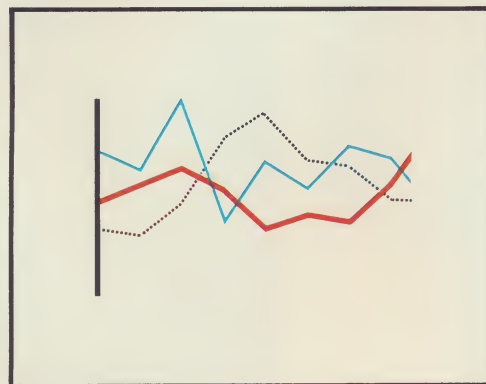

VARIATIONS: *Joined Bars, Divided Bar, Step-Bar, Sliding Bar, Deviation Bar.*

■ BAR CHART

For comparing many different items within any one time period. A series of fixed figures indicating results or status of varying items are best pictured in a bar chart. It's the simplest and easiest chart to make and understand. Preparation is faster with pressure-sensitive Chart-Pak Tapes. Their brilliant colors make your communication more effective.

VARIATIONS: *Joined Columns, Step Columns, Divided Columns, Over and Under Columns.*

■ LINE CHART

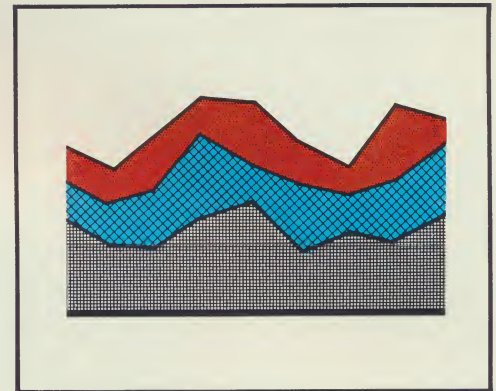

For presenting trends and direction or movement of change over a period of time. Most frequently used to show data corresponding to consecutive time periods. Two or three curves may be shown effectively. Chart-Pak's large selection of patterns and colors in "Curve-Line" Tapes offers greater leeway in curve-line graphic presentation.

VARIATIONS: *Broken Curve, Staircase Curve, Cumulative Curve, Line and Surface.*

■ SURFACE CURVE CHART

For showing differentiation of trends, amounts and results over a period of time. A dramatic variation of the basic line chart, it is also good for emphasizing one significant time, in a time series. Three curves can be shown if the lines do not cross. Chart-Pak "Curve-Line" Tapes make the narrow lines, and "Contak" Film, available in a multitude of shading patterns and 27 Contak Color Tints, create the areas between the lines.

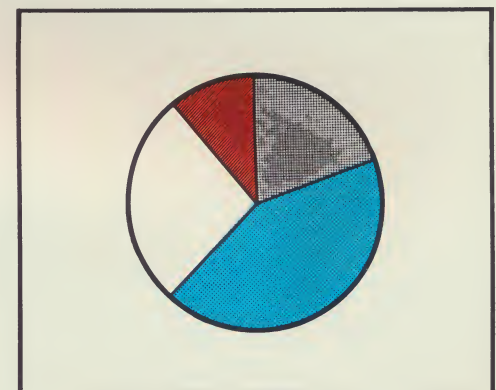

VARIATIONS: Staircase Surface, Cumulative Surface, Line and Surface.

■ PIE CHART

For showing divisions of a whole. The point of the chart should be immediately obvious. Unless the chart's purpose is to emphasize one sector, divisions of the circle should be few. Chart-Pak Tape Pen and Beam Compass attachment make perfect circles with tape. Shading should be light, and contrasts limited. Chart-Pak's varied selection of 27 Contak Color Tints and a wide variety of patterns in Contak Shading Film offers many compatible combinations.

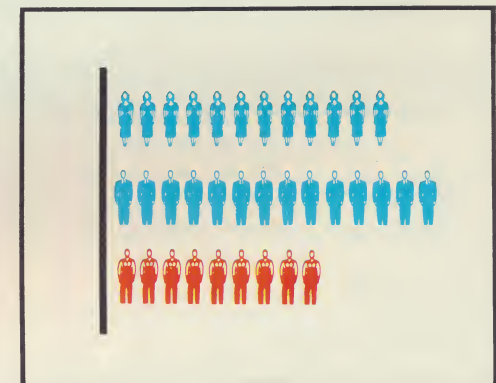

VARIATIONS: Double Pie, Miniature Pie, Satellite Pie, Segment Analysis Pie.

■ PICTORIAL CHART

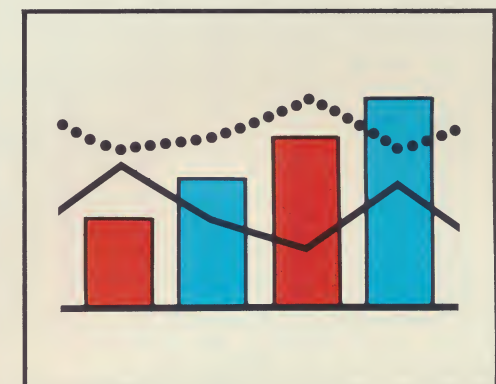

For showing simple comparisons of relationship symbolically. Statistical facts are presented this way when attention and interest must be attracted — as in newspapers and magazines. Symbols usually represent subject and quantity. Chart-Pak "Picto-Pak" and Trans-Pak die cut symbols contain many representative configurations in various sizes and base materials.

VARIATIONS: Bar and Picture, Column and Picture.

■ COMBINATION CHART

For combining the purposes of more than one chart. A combination of two, usually trend lines and column comparisons, is most effective. Simplicity is especially important because more than one point must be conveyed. Overlays are helpful. Chart-Pak Transparent Color Tapes are essential aids because they do not obscure material underneath and add "instant color" to your presentation.

Opaque Gloss Tapes

16 Solid Colors — Brilliant and Permanent "Curve-Line" & Standard Widths

Chart-Pak Opaque Gloss Tapes are used extensively and advantageously by draftsmen, engineers, architects, cartographers, technical illustrators, commercial artists, graphic designers and exhibit designers.

The smooth, gloss finish of these tapes enhances the vivid colors. Each of the 16 solid, permanent colors is brilliant enough to be distinguished from a distance and is extremely effective in direct visual presentations.

Chart-Pak Tapes are manufactured with a pressure-sensitive, heat-resistant adhesive. Tapes adhere easily, quickly. Stay down until you remove them. Lift off cleanly. Won't shrink, peel or fade. Guarantees perfect diazo and/or photographic reproduction.

Select tape width according to need. The seven widest widths for heavy lines, base lines, borders and creating color bars.

"CURVE-LINE" TAPES

The four narrow widths, Chart-Pak "Curve-Line"

Tapes, assure accuracy in lines as narrow as 1/64". All "Curve-Line" Tapes are guaranteed accurate to plus or minus .002".

"Curve-Line" Tapes are ideal for fine uniform lines and curves, borders, outlining, connecting lines and free-flow drawings. Curve tape with ease. Make sharp corners. For easy "Curve-Line" Tape application, use the Chart-Pak "Tape-Pen". It smoothly rolls on a line of Chart-Pak Tape either free hand or following a straight edge. The "Tape-Pen" is available in seven sizes.

Opaque Gloss Surface Tapes —
for visual communication

1/64" x 648" \$.80/rl. or \$3.50/pkg. 5 rls.	1501	1502	1503	1504	1505	1506	1507	1510	1511	1512	1513	1514	1515	1516	1517	1518

Available in these 4 widths

1/64" | 1/32" | 1/16" | 3/32"

SPECIAL SLITTING: All special slitting will carry the price of the next standard width as shown in the table. 10 rolls or more required for special slitting.

Perfect for quick presentations — The brilliance of Chart-Pak Opaque Gloss Tapes makes them easily visible for direct presentations.

Quick, Easy Revisions — Update outdated work simply by lifting and replacing tape. Lifts off without damaging layout material. Eliminates re-makes. Saves time and money.

Perfect Illustrations Without Ink — Chart-Pak "Curve-Line" Tapes and "Tape-Pen" may be used with guides or free-hand. Either way, an endless variety of shapes and forms may be made.

Ample Color Selection — Sixteen colors for a multitude of solid lines and curves used to identify or differentiate in maps, charts, graphs, technical illustrations and layouts.

Position, Press and Peel — Trans-Pak, Chart-Pak's new die cut symbols, are just as easy to use as Chart-Pak Tapes. Request a Trans-Pak drafting and visual communication catalog.

Creative Art And Art Work — Commercial artists rely on Chart-Pak Tapes in planning and preparing designs, layouts, mechanicals and client presentations.

Standard Width Gloss Tapes

SPECIFY CATALOG NUMBER AND QUANTITY WHEN ORDERING.

Opaque Matte Tapes

Non-Reflective Finish

"Curve-Line" & Standard Widths

10 Solid Colors — Vivid and Permanent

Chart-Pak Matte Surface Tapes are especially valuable to commercial artists, graphic designers and photographers, and are also used by draftsmen, engineers, architects, cartographers and technical illustrators.

Its non-reflective finish makes this tape practical for copyshooting and direct visual communication in group presentations and exhibits. Light doesn't bounce back. Glare and "hot spots" are eliminated.

The flat surface of Chart-Pak Matte Tapes is also an ideal writing surface for pen or pencil. When necessary, data may be written directly on the tape.

Chart-Pak Tapes are manufactured with a pressure-sensitive, heat-resistant adhesive. Tapes adhere easily, quickly. Stay down until you remove them. Lift off cleanly. Won't shrink, peel or fade. Perfect for crisp, clear diazo and/or photographic reproduction.

Select tape width according to use. The seven widest widths for heavy lines, base lines, borders and filling in bars.

"CURVE-LINE" TAPES

The four very narrow widths, Chart-Pak "Curve-Line" Tapes, assure accuracy in lines as narrow as 1/64". All Chart-Pak "Curve-Line" Tapes are guaranteed accurate to plus or minus .002".

"Curve-Line" Tapes are perfect for fine uniform lines and curves, borders, outlines, connecting lines and free-flow drawings. Curve with ease. Make sharp corners. Use the Chart-Pak "Tape-Pen" to guide the tape along a straight edge, French Curve or a geometric pattern.

Matte-Surface Tapes — for copy shooting and direct visual presentation.

- Charts & Graphs ■ Floor Plans
- Commercial Art Work ■ Graphic Designs
- Technical Illustrations ■ Maps
- Office & Plant Layouts

TAPE TIPS: In applying Chart-Pak Tapes, avoid stretching by simply *pressing* tape into position. Do not stretch the tape between the designated points.

- When making visual presentations, speaker notes can be written directly on Matte Surface Tapes.

See Page 6 for tapes with a gloss finish.

"Curve-Line" Matte Tapes

SPECIFY CATALOG NUMBER AND QUANTITY WHEN ORDERING.

Example: When ordering 1/16" Blue Matte Surface "Curve-Line" Tape, order 6203M — and the number of rolls or packages needed.

Sizes and Prices	Black	Red	Blue	Green	White	Yellow	Brown	Light Blue	Light Green	Dark Orange

1/32" x 648" \$.90/rl. or \$4.00/pkg. 5 rls.	3101M	3102M	3103M	3104M	3110M	3111M	3114M	3115M	3116M	3118M
1/64" x 648" \$.90/rl. or \$4.00/pkg. 5 rls.	1501M	1502M	1503M	1504M	1510M	1511M	1514M	1515M	1516M	1518M

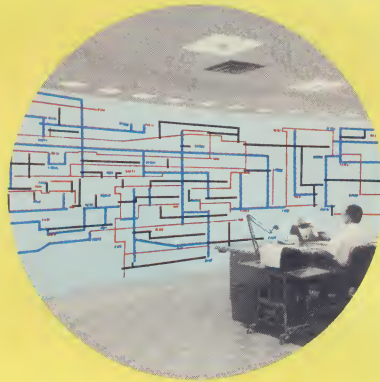

Available in these 4 widths

1/64" 1/32" 1/16" 3/32"

SPECIAL SLITTING: All special slitting will carry the price of the next standard width as shown in the table. 10 rolls or more required for special slitting.

Light Is Refracted — Chart-Pak non-reflective Matte Tapes are clearly viewed from any angle. No annoying glare in direct visual presentations.

Simple Identification — Giant wall map drawn with Chart-Pak Tape hangs on wall of Florida Power Corporation, St. Petersburg, Florida. Combination of matte solid-color, pattern and symbol tapes, slit to precise widths, aid in fast, positive identification of 400 miles of overhead distribution feeders and 50 miles of underground cables.

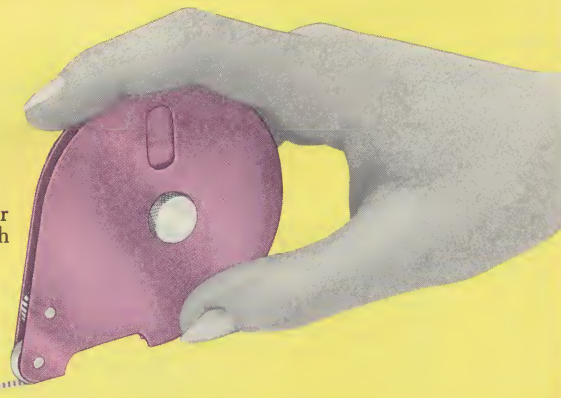

Crisp, Clear Photographic Shots — No problems for the graphic arts cameraman in cophotocopying. "Hot spots" are eliminated. Crisp, clear dense negatives — minimum opaquing.

Ideal Writing Surface — When necessary, data or speaker notes may be applied directly on the matte-flat surface of Chart-Pak Matte Tapes

Chart-Pak's Precision "Tape-Pen" for accurate, uniform lines made with "Curve-Line" Tape. See Page 15.

SPECIAL SLITTING: All special slitting will carry the price of the next standard width as shown in the table. 10 rolls or more required for special slitting.

11 Transparent Colors — Vivid and Permanent Standard and "Curve-Line" Widths

Chart-Pak Transparent Color Tapes are used primarily in the Audio-Visual field, and by teachers and training personnel. Transparent Color Tapes are also used effectively by commercial artists, technical illustrators, cartographers, draftsmen, engineers and architects.

The clear finish and transparency of the color and adhesive allow for full brilliant transmission of color for projection. Especially useful for slides and projectuals. Add instant color to any projectual. Transparent Color Tapes placed over copy, artwork or photographs do not obscure material underneath. Quick, colorful presentations are possible with Chart-Pak Transparent Color Tapes.

Chart-Pak Transparent Color Tapes are backed with a pressure-sensitive, heat resistant adhesive. Tapes adhere easily, quickly. Stay down until you remove them. Lift off cleanly. Won't shrink or peel. Transparent Color Tapes are perfect for diazo reproduction when shades of grey are needed.

Transparent Color Tapes are available in six widths and eleven colors. The widest widths for heavy lines, base lines, borders

and color bars. The "Curve-Line" widths are perfect for fine uniform lines and curves, borders, outlines, connecting lines and free-flow drawings. Use Chart-Pak "Tape-Pen" to guide narrow width tape along a straight edge, French Curve or geometric pattern.

Transparent Color Tapes provide "instant color" — for slides, transparencies, projectuals and overlays.

1/32" x 648"	3119	3109	\$1.10/rl. or \$5.00/pkg. 5 rls.
1/64" x 648"	1519	1509	\$1.10/rl. or \$5.00/pkg. 5 rls.

Weather-Resistant Finish Standard & Narrow Widths

Chart-Pak Chrome & Gold Tapes are attractive and effective as decorative or symbolic colors in visual presentations, signs, exhibits, displays, bulletin boards, striping and modeling.

Thin-gauge, tough, weather-resistant metallized "Mylar"* base material makes these tapes especially suitable for outdoor usage. These tapes are metallized (non-conductive) and have a permanent bright metallic-looking finish.

*DuPont's registered trade-mark for their polyester film.

SPECIFY CATALOG NUMBER, COLOR AND QUANTITY WHEN ORDERING.

Example: When ordering 1/4" Chrome Tape, order 2519 and the number of rolls required.

SPECIAL SLITTING: All special slitting will carry the price of the next standard width as shown in the table. 10 rolls or more are required for special slitting.

Chart-Pak Spaced Lettering

Opaque Black Letters on Clear Pressure-Sensitive Acetate Film

Chart-Pak Spaced Lettering is quickly transferred to any smooth surface—paper, card stock, polyester film, acetate, wood, metal, glass.

Characters are printed in opaque black on clear acetate pressure-sensitive sheets. Just lift the letters off the sheet and place into position. Letters adhere easily, quickly. May be lifted and repositioned. Heat-resistant adhesive assures crisp reproduction by diazo or photographic methods. Letters won't shrink or peel.

Each set contains the complete alphabet, numerals and punctuation marks plus an abundance of the most frequently used characters—all in an easy-to-read type face. Area to the right of each character allows for accurate spacing. Chart-Pak Spaced Lettering sets include Lettering Guide and Layout Sheet. Application is simple, assures professional results. (Upper and lower case available in all sizes except 96 point lettering, which is available in upper case only.)

SPACED LETTERING — for visual presentation, reproduction (diazo and photographic) or overhead projectuals.

Standard & "Curve-Line" Widths

Chart-Pak Opaque and Transparent Pattern Tapes are used by draftsmen, engineers, architects, cartographers, technical illustrators, commercial artists, graphic designers, chartists and exhibit designers. Audio-Visual people, teachers and training personnel are also prime users of Chart-Pak Opaque and Transparent Pattern Tapes.

Ten different patterns, each available in six widths, offer chart and graph makers endless possibilities for quick distinctive color lines, bars and curves. The widest widths eliminate tedious hand-crosshatching on charts and graphs. Spacing and patterns are consistently equal. "Curve-Line" Tapes are perfect for fine uniform lines and curves, borders, outlines, connecting lines and free-flow drawings. Use Chart-Pak's "Tape-Pen" to guide tape along a straight edge, French Curve or geometric pattern.

Available in "Curve-Line" sizes from 1/64" to 1/16" and in standard sizes from 1/8" to 1/4".

The clear finish of Transparent Tapes reproduces beautifully by the diazo method and lets you differentiate by pattern. Opaque Tapes photograph crisp and clear.

Chart-Pak Tapes are backed with a pressure-sensitive, heat-resistant adhesive. Tapes adhere easily, quickly. Stay down until you remove them. Lift off cleanly. Won't shrink or peel.

Standard Pattern Tapes — *opaque* for direct visual communication and photographic reproduction.

transparent for diazo reproduction and overhead projectuals.

BEAM COMPASS "TAPE-PEN" HOLDER

Designed for use with a Chart-Pak "Tape-Pen" to make circles with all narrow width tapes. Adjustable to various sizes, it also makes half-circles and arcs.

Additional beam sections (9-3/4") may be attached to the holder for larger circles.

Cat. No. 328 (2" to 18" diameter circles) **\$9.50**

Cat. No. 328E

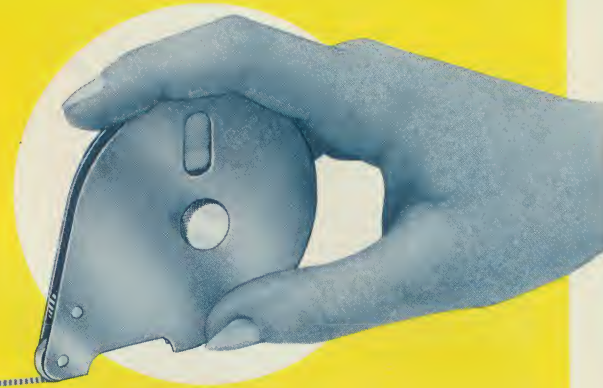

(9-3/4" individual beam section with screw) **\$2.00**

ADJUSTABLE "TAPE-PEN"

The Chart-Pak Adjustable "Tape-Pen" is another useful instrument for people involved in making visual presentations. This plastic pen is used to apply several parallel lines at the same time or a combination of wide lines and "shroud lines."

Any combination of Chart-Pak Tapes aggregating 1/16", 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 9/16", or 5/8" can be used. Space bars with movable guides facilitate easy adjustment.

Cat. No. 325 **Price \$4.50**

PRECISION "TAPE-PEN"

The Chart-Pak "Tape-Pen" is designed for draftsmen, engineers, architects, layout men, technical illustrators, cartographers, commercial artists, as well as chart and graph makers.

This precision-engineered drawing instrument "rolls on" straight lines and curves quickly and easily. Just guide the pen along a straight edge, French curve or any geometric pattern. Or use it free-hand. Either way, accurate and uniform lines are assured.

The "Tape-Pen" is especially designed for "Chart-Pak "Curve-Line" and narrow width tapes. It's easy to load, easy to operate. Side slot shows tape color and supply. Pens are color-keyed according to size for easy identification.

Cat. No.	(Tape Width)	Color Key	Price
320	1/16"	Gold	\$6.95*
321	1/32"	Green	\$6.95*
322	1/8"	Red	\$6.95*
323	1/4"	Blue	\$8.50
326	1/64"	Copper	\$6.95*
330	3/32"	Pink	\$6.95*
331	3/16"	Orange	\$6.95*

*Set of any two in these sizes \$13.00.

TRANS-PAK

Pressure-Sensitive Die Cut Symbols for Drafting and Visual Communications

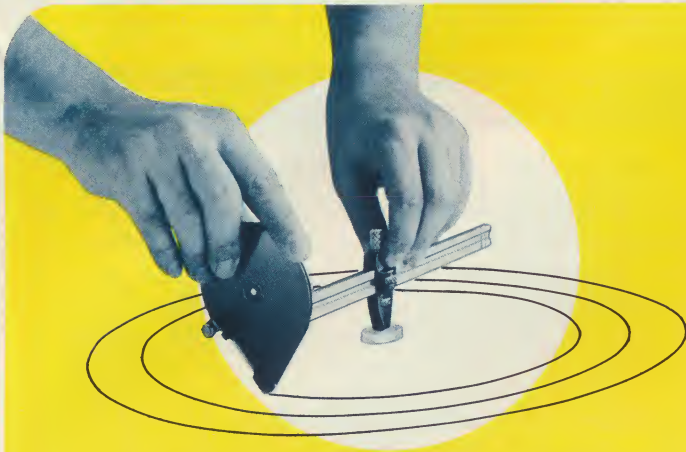

Trans-Pak pressure-sensitive die cut symbols are used for drafting, technical illustrations, charts and graphs, cartography, PERT programming, lithography, art work and other forms of visual communication.

Trans-Pak offers a new, patented method for the application of pressure-sensitive die cut symbols. Just position, press and peel any one of a multitude of Trans-Pak symbols. Eliminate repetitive drawing. Save time by using the fast, accurate, distortion-free Trans-Pak method. Trans-Pak symbols reproduce crisp and clear through the diazo and/or photographic process.

Trans-Pak symbols combine readily with other Chart-Pak components. May be reproduced by diazo and/or photographic processes. Symbols are available in many sizes, five base materials and 16 colors. Letters and numbers are also available. And there is **NO DIE CHARGE** for special symbols.

Ask your dealer or write to Chart-Pak for the new Trans-Pak catalog.

Statistical, Reference and Special Symbol Tapes

Opaque and Transparent Tape

A variety of more than 50 statistical, reference and special symbol tapes are available to draftsmen, engineers, architects, commercial artists, and chart, graph and map makers. Just roll out the desired symbol, and press it down. Symbols are consistently sharp, accurate and uniform. Tapes eliminate tedious repetitive drawing.

These tapes are Chart-Pak's dual layer tapes. The symbols are printed on transparent tape with opaque black ink and then laminated with a thin clear transparent tape to protect the printing.

All Chart-Pak Tapes are backed with a pressure-sensitive, heat-resistant adhesive. Tapes adhere easily, quickly. Stay down until you remove them. Lift off cleanly. Won't shrink, peel or fade. Perfect for diazo reproduction and overhead projectuals. (Use opaque tapes for photographic or office copy machine reproduction processes.)

Symbol Tapes for direct presentation, reproduction or projection

- *Charts & Graphs*
- *Maps & Diagrams*
- *Plant & Office Layouts*
- *Floor Plans*
- *Commercial Artwork*
- *Technical Illustrations*

See page 12 for standard pattern tapes, page 26 for additional plant and office layout tapes, page 22 for border tapes.

TAPE TIP: When working with pressure-sensitive tape, the end of the tape, when not in use, should be folded under for easy starting.

To order special printed tapes see page 38.

1. From preparation.

2. To direct presentation.

3. To the making of copies.

4. Chart-Pak pre-printed tapes are used effectively for making statistical charts, graphs, visual presentations. Perfect masters — perfect copies consistently with Chart-Pak pressure-sensitive tapes and components.

SPECIFY CATALOG NUMBER, FINISH AND QUANTITY WHEN ORDERING.

Example: When ordering "ship" symbol in transparent finish, order S43T and the number of sheets needed.

T = Transparent O = Opaque
If "O" or "T" are not specified, "O" will be shipped.

**Opaque White Ledger Paper —
Translucent Plastic Film — Matte Finish**

"Picto-Pak", copyrighted symbols developed by the Pictograph Corporation, are used by chart, graph and map maker, teachers, training personnel and people in the audio-visual field.

Statistical facts are presented symbolically in charts and graphs when attention and interest must be attracted. "Picto-Pak" contains a variety of typically representative symbols that combine readily with all Chart-Pak pressure-sensitive products.

Symbols are printed in opaque black ink in groups of three sizes — 1-1/4", 3/4", and 1/2" high — on 8-1/2" x 11" sheets of opaque white ledger paper or clear transparent plastic film. Both sheets have a writeable finish. Takes typing or writing. Sheets are backed with a pressure-sensitive, heat-resistant adhesive.

Opaque for direct presentations and photographic reproduction. *Transparent* for overlays, slides, transparencies and diazo reproduction.

for Making Printed Circuit Masters

Black Crepe & White Back Tapes

Chart-Pak Crepe Paper and White Back Tapes are effectively used by printed circuit draftsmen and technical illustrators. The tapes are backed with a pressure-sensitive, heat-resistant adhesive. Adhere easily, quickly. Won't shrink, peel or discolor. Stay down until you remove them. Lift off cleanly.

Conductor paths are taped down quickly and accurately. Hours of tedious inking are eliminated. Chart-Pak's precision-slit tapes assure uniformity in even the narrowest widths.

Black Crepe Paper Circuit Tape

(Precision-slit to plus or minus .002") *New length — no increase in price

The completely opaque, non-reflective surface makes Black Crepe Paper Tape ideal for master artwork of printed circuit drawings. Photographic or diazo reproductions come through crisp and clear. The tape may be used directly on the copper plate as resist or for diazo or photographic reproduction on any standard base drawing material — tracing paper, acetate, Mylar*, Cronar*. And Crepe Paper Tapes curve easily — with little distortion.

*DuPont Registered Trade Mark

TAPE TIP: Use Chart-Pak's Tape Pen to facilitate perfect positioning of narrow-width tapes.

SPECIFY CATALOG NUMBER AND QUANTITY WHEN ORDERING

Example: When ordering 1/4" Black Crepe Paper Tape, order CP2051 and the number of rolls needed.

A NEW METHOD . . . for the application of pressure sensitive printed circuit die cut symbols. The TRANS-PAK method assures Fast, Accurate, and Distortion-free die cut symbol placement. The added value of a NO DIE CHARGE policy for special die cut symbols, makes this catalog the most complete printed circuit die cut catalog available anywhere.

TRANS-PAK — PRINTED CIRCUIT SYMBOLS Position, press and peel any one of Chart-Pak's many special Trans-Pak die-cut symbols — circles with center holes, teardrops with vanishing point, teardrops, ovals, fillets, T-connectors and elbows. Available in translucent ruby red and opaque black crepe. See your dealer or write to Chart-Pak for a Trans-Pak Printed Circuit Catalog.

*NOTE: increased length of roll, no increase in price

SPECIAL COLORS: Crepe paper tape is available in red, blue, yellow, green and white on minimum orders of ten rolls per color. Prices same as for standard black crepe paper widths. Specify width, color and quantity when ordering.

Crepe Paper Tape Available in 5 Colors

Uniformity In Lines And Symbols — Chart Pak's precision-slit tapes and Trans-Pak die-cut symbols assure accuracy and uniformity in the finest detail work. Quick application eliminates tedious drawing.

White Back Circuit Tape

(Precision-slit to plus or minus .002")

Chart-Pak White Back Circuit Tape offers three plus factors for back-to-back printed circuit layouts: **1.** Surface is non-reflective dull black. **2.** Reverse is opaque white with a pressure-sensitive clear adhesive backing. **3.** For perfect register of two layouts, the white is completely visible through Translucent Precision Grids. Yet it disappears when photographed against a white background. Trans-Pak White Back die cut symbols are also available.

Roll Size	Cat. No.	Price

■ Pattern Blockout Tapes

■ Special Point Size Tapes

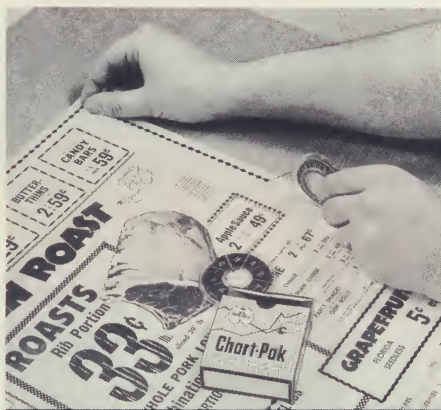

Chart-Pak Graphic Arts Tapes are used primarily by commercial artists in publishing houses, advertising agencies and advertising departments; graphic designers; lithographers and engravers. Decorative Border Tapes are also used by technical illustrators, draftsmen, chart, graph and map makers.

Modern printing processes, such as photo lithography, offset or photo composition, are efficient printing production methods used by commercial printers, newspapers, magazine and book publishers. Chart-Pak Graphic Arts Tapes save additional time and costs in the preparation of material — from the initial layout to finished art work to negatives for plates — prior to press time.

Meet all deadlines. Just press down Chart-Pak Tapes. Pressure-sensitive, heat resistant adhesive backing sticks easily, quickly. Tapes stay down until you remove them. May be lifted and repositioned. Won't shrink, peel or fade. Assure sharp, clean photographs and diazo reproduction.

Quick Borders For Rush Jobs —

Difficult grocery ads and other retail ads in the Quincy Patriot Ledger (Quincy, Massachusetts) are a cinch with Chart-Pak Border Tapes. Problems with boxes, fill-in rules and outside borders are solved in plenty of time to meet deadlines.

True Photo Reproduction — To assure crisp, clear photographic reproduction, Chart-Pak Newspaper and Decorative Border Tapes are printed in opaque black. For even sharper reproduction, edge overlap is kept at a minimum.

Newspaper & Decorative Border Tapes

Transparent & Opaque Tape

Chart-Pak Newspaper and Decorative Border Tapes are available in more than 50 distinctive patterns developed in co-operation with the American Newspapers Publishers Association.

Chart-Pak Border Tapes eliminate wasted steps in the preparation of art work for printed media. Eliminate repetitive drawing, hot composition and proofs, cutting and pasting. Simply roll out pressure-sensitive tapes and press down borders, rules, design elements.

Patterns are printed in opaque black. Opacity assures true photo reproduction. Minimum edge overlap for even sharper reproduction. Chart-Pak's special dual layer laminating process protects the printed patterns permanently. Patterns are printed on clear transparent or white opaque tapes.

Special Point Size Tape

Precision-Slit

Special Chart-Pak Tapes, precision-slit to newspaper type point sizes, are used for accurate narrow borders, column lines and rules in cold type composition and commercial art work.

Chart-Pak will also slit any standard pattern tape (pages 12, 13) into 6 point or 12 point widths for newspaper layout work. A minimum order of 10 rolls of each desired width is required.

Available in black only

Cat. No. Black	Pt. Size	Dec. Equiv.	Length of Roll	Price
G2	2	.0277"	648"	\$.80/rl. or 3.50/pkg. 5 rls.
G3	3	.0415"	648"	\$.80/rl. or 3.50/pkg. 5 rls.
G4	4	.0552"	648"	\$.80/rl. or 3.50/pkg. 5 rls.
G6	6	.083"	324"	\$.80/rl.
G12	12	.166"	324"	\$.90/rl.

Perfect Register Of Rules — Mitered corners for borders and frames always meet. Down rules and cross rules line up. And all lines are consistently uniform when made with Chart-Pak precision-slit Point Size Tape.

Ben Day Pattern Tape

Transparent & Opaque Finish

Developed especially for newspaper cold type composition, Ben Day Pattern Tapes also save valuable time in the preparation of shading, tints and screens in all art work for photo reproduction. Ben Day Tapes eliminate stripping and cutting problems of previous pre-printed Ben Day Sheets.

Available in black

Catalog No.	Point Size	Dec. Equiv.	Price
G 6 K (opaque)	6 pt. x 324"	.083	\$.80/rl.
G 6 K T	6 pt. x 324"	.083	\$.80/rl.

Standard Blockout Tape**Translucent**

Excellent for "block out" work in setting up negatives for printing of forms. Also for opaquing, stripping or edging negatives in photographic labs. Available in six standard widths and two type point sizes: 6 point (.083") and 12 point (.166"). Tapes are maroon. Translucency makes them ideal as an additional color in overhead projectuals.

Contak Shading Films & Color Tints

Contak Shading Films and Color Tints are ideal for commercial artists, illustrators, graphic designers, architects, draftsmen, chart, graph and map makers.

Contak Shading Films provide perfect shaded effects, screens and patterns in large areas of line drawings for photo or diazo reproduction. More than 72 patterns are available in black and color on transparent and matte Mylar® film. Sheets are 9" x 12".

Contak Color Tints add color to layouts, finished art work, overlays, slides and projectuals. Twenty-seven permanent transparent colors are available on 9" x 12" and 14" x 19" sheets of Mylar® film.

**DuPont Registered Trademark*

See your dealer
or write to Chart-Pak
for a Contak catalog.

Attractive Contak Illustrations — Finished art work for fashion illustrations, technical illustrations or other large drawings requiring color shading and screens are completed quickly with color tints and shading films. Pressure-sensitive, heat-resistant adhesive requires no burnishing.

Structural & Material Conveyor Tapes

Transparent Tape

Chart-Pak Structural and Material Conveyor Tapes are used in the preparation of plant layouts by architects, engineers, draftsmen, industrial designers, plant managers and machinery and equipment salesmen. Many of the Structural Tapes are also used in office layouts.

Chart-Pak eliminates repetitive drawing with a variety of more than 50 representative patterns — draftsman-drawn to a scale of $\frac{1}{4}'' = 1''$. Chart-Pak's special dual layer manufacturing process permanently protects the printed patterns. The patterns are printed with opaque black ink on transparent tape and then laminated with another thin clear transparent tape to protect the printing.

All Chart-Pak Tapes are backed with a pressure-sensitive, heat-resistant adhesive. Tapes adhere quickly, easily. Stay down until you remove them. May be lifted and repositioned. Won't shrink, peel or fade. Perfect for diazo and/or photographic reproduction.

Structural and Material Conveyor Tapes for direct presentation, diazo or photographic reproduction.

- *Office Layouts*
- *Floor Plans*
- *Technical Illustrations*

TAPE TIP: When working with pressure-sensitive tape, the end of the tape, when not in use, should be folded under for easy starting.

To order special printed tapes see page 38.

Chart-Pak Procedure For Preparing Plant Layouts

**This Easy-To-Use
6-Step Method
Will Assist You In
Making Neat, Accurate
Plant Layouts**

1

Assemble necessary materials: appropriate Chart-Pak structural, conveyor, symbol and solid color tapes; templates sheets; planning board or layout sheet; tape cutter and tape pen.

2

Indicate locations of machinery and material conveyors. (Architectural drawings, blueprints and survey data provide information on structural components: walls, columns, aisles, partitions, stairs, windows, doors, radiators, air conditioners, power facilities, etc.)

3

Apply and position tapes and templates. (Special templates may drawn and trimmed to exact s on Chart-Pak Template Sheets. Tapes and templates may be lifted and repositioned without damage to planning board or layout sheet.

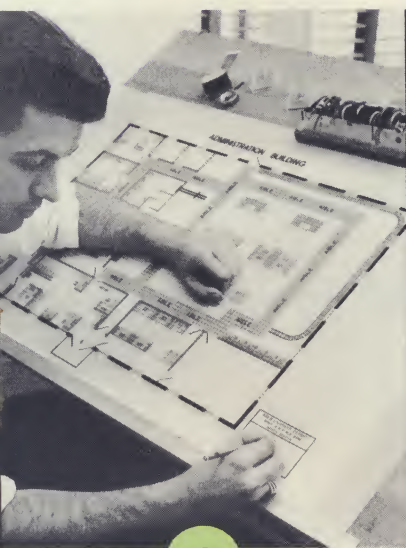

STRUCTURAL AND MATERIAL CONVEYOR TAPES FOR PLANT LAYOUTS

Turn Into A "Quick-Change Artist" — Chances are, your original layout will require revisions before all minds are made up. For quick changes, simply lift and reposition Chart-Pak Tapes — as often as necessary.

More Than 50 Patterns — The most complex layout is easily and quickly prepared with Chart-Pak Tapes. A large variety of structural and conveyor patterns are pre-drawn to a scale of $1/4" = 1'$. Repetitive drawing is eliminated as walls, power lines, conveyors are pressed down.

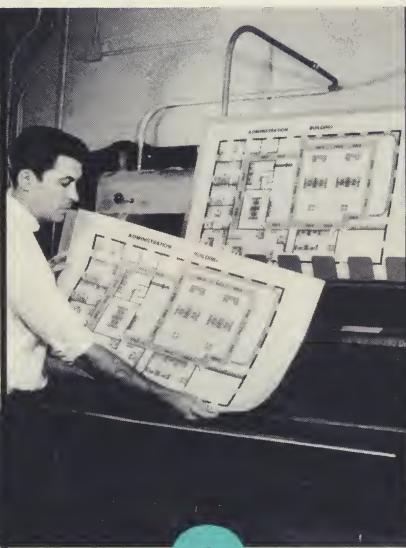

4

Write in dimensions, reference information and instructions where necessary. Matte finish of Chart-Pak planning boards and layout sheets takes pen, pencil and crayon. Chart-Pak Spaced Lettering or Trans-Pak Lettering* may be used also. Or data may be typed on pressure-sensitive transmatte or ledger paper and affixed to board.

5

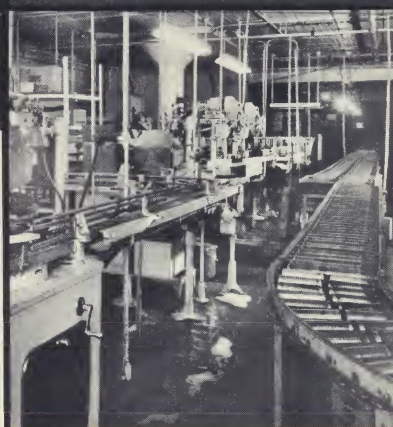

Inspect finished layout. Make last minute changes simply by lifting and repositioning or replacing tapes and templates. Erase unnecessary pencil markings. Layout is now ready for direct presentation or reproduction.

6

Make copies of the original layout. Diazo or photographic reproduction processes may be used. Materials used in the layout will not be affected by either method.

*Ask your dealer or write to Chart-Pak for a Trans-Pak Visual Communications catalog.

Planning Boards

Model A and E Boards

For the ideal surface on which to make charts, graphs, and layouts with Chart-Pak tapes, Chart-Pak recommends these specially constructed, laminated plastic boards. Non-porous surface makes it easy to remove and replace materials. Can be used indefinitely. White, with non-reproducible blue grid lines in marked intervals, for guide lines. Opaque matte finish is easy to write on with pencil or crayon — and is easily cleaned with Chart-Pak Plastic Cleaner (page 40), or a mild solution of liquid detergent. Available in two styles: for layouts and organization charts, and for graphic charts. Also in two metric sizes. Excellent as a base layout sheet for photographic reproduction.

■ For layouts, statistical and organization charts

Model A Planning Board — 20-3/4" x 32-1/2" x .03". Printed area 20" x 30". Every fourth line on each axis is accented. Four units to the inch.

Price — \$13.75 ea. \$11.00 ea. in pkgs. of 3 or more.

Model E Planning Board — 10-3/4" x 17" x .02". Printed area 10" x 16". Every fourth line on each axis is accented. Four units to the inch.

Price — \$4.50 ea. \$3.60 ea. in pkgs. of 6 or more.

Model A METRIC Planning Board — 52.6 cm x 82.5 cm x .7 mm. Printed area 50 cm x 76 cm. Every fourth line on each axis is accented. Four units per centimeter.

Price — \$13.75 ea. \$11.00 ea. in pkgs. of 3 or more.

Model E METRIC Planning Board — 27.3 cm x 43.2 cm x .7 mm. Printed area 24 cm x 40 cm. Every fourth line on the axis is accented. Four units per centimeter.

Price — \$4.50 ea. \$3.60 ea. in pkgs. of 6 or more.

Model A-5 Planning Board — 20-3/4" x 32-1/2" x .03". Printed area 20" x 30". Every fifth line on each axis is accented. Five units to the inch.

Price — \$13.75 ea. \$11.00 ea. in pkgs. of 3 or more.

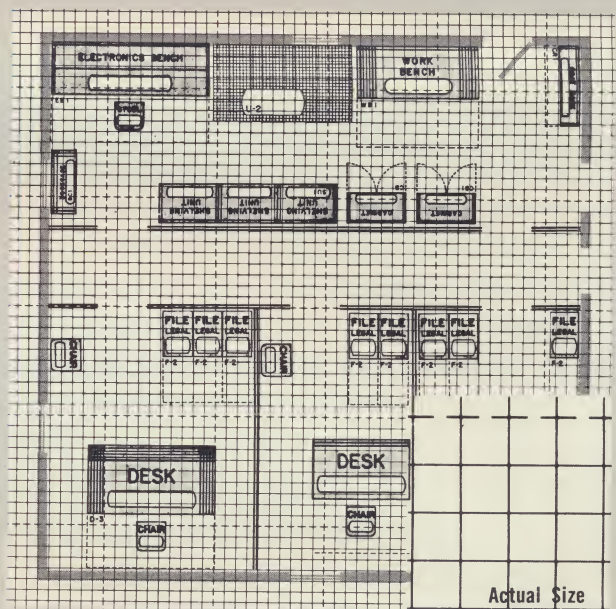

Model E-5 Planning Board — 10-3/4" x 17" x .02". Printed area 10" x 16". Every fifth line on each axis is accented. Five units to the inch.

Price — \$4.50 ea. \$3.60 ea. in pkgs. of 6 or more.

Transgrid Layout Sheets

Translucent Matte Surface

For plant and office layouts or technical illustrations where a 1/4" grid is needed. Every tenth line is dashed. Printed with orange or black grid (reproducible) or blue grid (non-reproducible). Made of translucent matte finish MYLAR® .0075" thick, grid sheets are available in rolls or custom cut sheets. Ink and pencil is easily erased. Translucent matte surface assures crisp reproduction.

Sheet width is 36"; printed area is 35".
Standard lengths listed above;
all others are dealer custom cut to your need.

Length of Piece	Black Grid	Orange Grid	Non-Re-producible Blue Grid	Price Per Piece
1 yd.	TBK-1	TBO-1	TBL-1	\$ 6.50
5 yds.	TBK-5	TBO-5	TBL-5	28.00
10 yds.	TBK-10	TBO-10	TBL-10	54.00

Metric Transgrid Layout Sheets

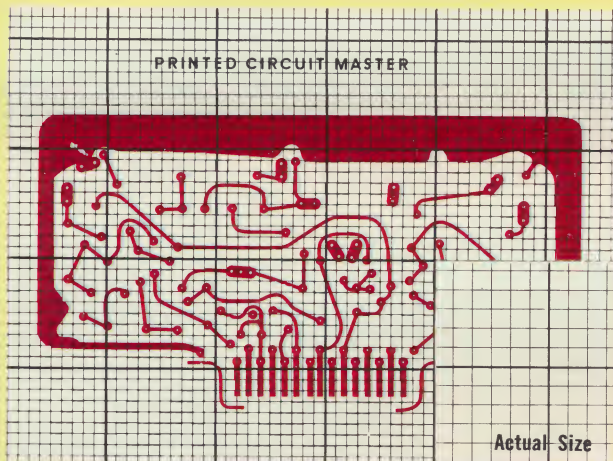

Length Of Piece	Black Grid	Non-Re-producible Blue Grid	Price Per Piece
1 yd.	TMBK-1	TMBL-1	\$ 6.50
5 yds.	TMBK-5	TMBL-5	\$28.00
10 yds.	TMBK-10	TMBL-10	\$54.00

Specify color when ordering.

Precision Grids

Translucent Matte Surface

For master drawings for printed circuitry, or wherever accuracy and dimensional stability is of critical importance. The distance between any two lines is guaranteed accurate within .005". Grids are printed in black or non-reproducible blue on matte finish MYLAR®, .0075" thick.

Cat. No. PG-10 21" x 31" x .0075". Print area 20" x 30", 10 lines per inch, each 10th line is accented.

Price — 1-49 sheets \$12.50 each 50 sheets or over \$10.00 each.

Cat. No. PG-8 21" x 31" x .0075". Printed area 20" x 30", 8 lines per inch, each 8th line is accented.

Price — 1-49 sheets \$12.50 each 50 sheets or over \$10.00 each.

Cat. No. PG-10L 31" x 41" x .0075". Printed area 30" x 40", 10 lines per inch. Each 10th line is accented.

(Available in blue only)

Price — \$20.00 each.

Specify color when ordering.

*DuPont Registered Trademark

Accurate Positioning — Precise intervals between grid lines, broken lines or accented solid lines on Chart-Pak planning boards, layout sheets and precision grids assure perfect positioning of tapes and components.

Efficient Revisions — Non-porous matte surface of Chart-Pak plastic boards makes it easy to lift off tapes and components. Save time and money. Update & connect simply by removing and replacing.

Re-usable Boards And Sheets — Indefinite use. Matte finish takes pencil or crayon. May be erased or easily cleaned with Chart-Pak Plastic Cleaner.

Office and Drafting Room Furniture

Chart-Pak Templates are valuable planning aids for architects, plant layout draftsmen, interior designers, office managers and furniture, equipment, and systems salesmen.

Die-cut from either plasticized paper and/or matte finish film, Chart-Pak Templates are extremely accurate. A backing sheet protects the heat-resistant, pressure-sensitive adhesive. Templates are applied easily and quickly. May be lifted and repositioned many times without damage. Available in opaque or transparent base for photographic and diazo reproduction.

Sizes indicated in table are maximum dimensions. To facilitate accurate trimming for smaller or "in-between" sizes, Chart-Pak Templates are marked with lines representing 2" decrements. Simply trim to appropriate size.

O — Opaque Templates — Plasticized, non-curling material. Use for Photographic reproduction on opaque planning board (page 30).

T — Transparent Templates — On transparent, matte finish plastic. For diazo reproduction on transparent grid (page 31).

SPECIFY "O" OR "T" IN CATALOG NUMBER AND 1/8" OR 1/4" TEMPLATE SCALE WHEN ORDERING.

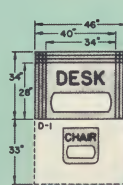

TAPE TIP: To apply template, lay it face down, loosen the corner of backing sheet at the split with Chart-Pak chisel, and peel backing sheet away from Template. Never peel template from backing sheet.

Transparent and Opaque Pressure Sensitive Base Materials

Chart-Pak Symbols are used in organization, work flow and data processing charts.

A complete selection of standard symbols is available to facilitate simple, fast chart-making. All Chart-Pak Symbols are manufactured with a pressure-sensitive, heat-resistant adhesive and a protective backing. Simply remove the backing, and press down symbols. No burnishing required. Chart-Pak Symbols also add greater flexibility to charts. Revisions are easy. Just lift outdated symbols off the board, and add the new ones.

All symbols are printed on sheets of white opaque ledger paper and transparent matte finish film. May be reproduced by diazo or photographic processes. Transparent materials assure clear, crisp diazo reproduction.

Chart-Pak provides all the symbols, tapes and tape components, and materials used in the preparation of professional charts:

■ Pre-printed Symbols

■ Spaced Lettering — page 11

■ Special Symbols — page 39

CHART-PAK PROCEDURE FOR PREPARING CHARTS Simple — Fast — Flexible

Each package of Chart-Pak Symbols includes these instructions on chart make-up:

1. Type or letter necessary data on boxes, circles or other symbols where required. (Or Chart-Pak Spaced Lettering may be used.)
2. Trim symbols as needed and arrange symmetrically on the Planning Board.
3. Remove symbol backing and press symbols on board.
4. Connect symbols with appropriate tapes.
5. To revise chart symbols, just peel off and replace.
6. Display or reproduce finished chart by diazo or photographic methods.

TAPE TIP: When separating symbols from protective backing sheet, pull the backing away from the symbols.

Organization and Flow Chart Symbols

Available in Pressure-Sensitive Ledger Paper
and Pressure-Sensitive Matte Finish Film

Chart-Pak rectangles and circles are designed primarily for organization and flow charts, but are also used as title blocks, legend frames and labels in blueprints, graphs and maps.

Rectangles are available in 17 sizes. Circles in two sizes. All symbols are printed on pressure-sensitive sheets for typing and layout ease. Rectangles and Circles are printed in black.

For special sizes, see page 39.

**SPECIFY CATALOG NUMBER AND
QUANTITY WHEN ORDERING.**

Work Flow and Data Processing Symbols

Pressure-Sensitive Transparent and Opaque Symbols

Chart-Pak Work Flow and Data Processing Symbols are used to illustrate flow of work and material, flow and handling of forms and machine accounting data in charts.

Chart-Pak's variety of standardized symbols makes it easy to indicate graphically one or many steps in the flow of manufacturing materials and paper work, in plants and offices.

Pressure-Sensitive Ledger Paper or Matte Finish Film Packages contain six sheets — one for each symbol. Each sheet contains 115 replicas of one symbol (44 large, 39 medium, 32 small). Blank sheet for making special symbols also included. Sheets measure 6-3/4" x 9-1/2". Symbols are printed in black.

Cat. No. DP-21-O (Opaque).... \$1.00 pkg.

Cat. No. DP-21-T (Transparent) \$1.00 pkg.

Work Flow Form Symbols

Pressure-Sensitive Ledger Paper and Matte Finish Film

Form Symbols are rectangular frames used primarily to show flow of paper work by adding forwarding instructions to the symbols.

Packages contain 10 sheets. Each sheet contains 13 1-copy, 5 2-copy, 5 3-copy, 2 4-copy, 2 5-copy, 1 7-copy forms.

Frames are printed in black.

FS-50 (Opaque)..... \$3.50 pkg.

FS-50-T (Transparent)..... \$3.50 pkg.

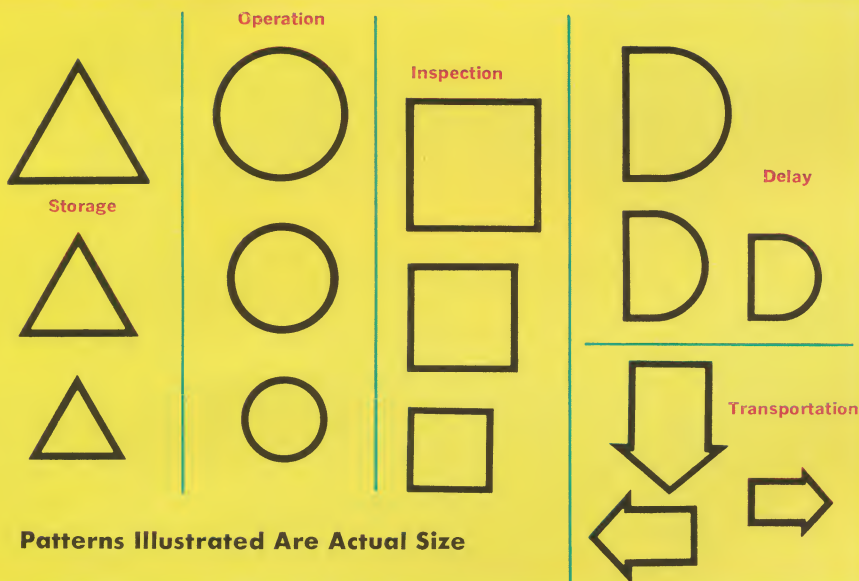

Many pressure-sensitive die cut Trans-Pak symbols are available for organization, work flow and data processing charts. Ask your dealer or write to Chart-Pak, Inc. for a Trans-Pak catalog.

Organization Charts Made Easier — Chart-Pak provides rectangles and circles in an ample variety of sizes for the most complex organizational set-up. Lines of authority and lines of staff are made with Chart-Pak Pressure-Sensitive Tapes.

Work Flow Readily Identified — Chart-Pak's standard symbols for work flow combined with Chart-Pak Color Tapes make the most involved operations easy to follow. Plastic Planning Boards facilitate preparation.

Crisp, Clear, Reproduction — Chart-Pak Form Symbols and other organization, work flow and data processing symbols are available on opaque white ledger paper and transparent matte finish film. Opaque for photographic reproduction. Transparent for diazo.

Pert Symbols

Chart-Pak PERT Symbols facilitate preparation and assure immediate understanding of PERT (Program Evaluation Review Technique), CPM (Critical Path Method) and similar charts used by government agencies, contractors and subcontractors.

By graphically illustrating the tasks involved in a project, the sequence of their performance and the amount of time they require, management is able to plan, schedule and control all operations from start to finish. Progress, delays and their effects are determined at a glance.

Chart-Pak PERT Symbols listed on this page are printed in black and die cut from pressure-sensitive base materials. Symbols in sheet form are available on opaque white sheets or translucent matte sheets. In roll form, they are available on opaque white or translucent matte material. The finishes provide an ideal writing or typing surface for explanatory notes and titles.

Sheets and rolls are backed with a pressure-sensitive, heat-resistant adhesive. Symbols adhere quickly, easily. Stay down until you remove them. May be lifted and replaced as determined by program reviews, replanning, rescheduling. Chart-Pak Symbols reproduce crisp and clear. Perfect copies of a master PERT network are made by diazo or photographic processes.

Chart-Pak provides all the PERT Symbols and a variety of pressure-sensitive tapes for the most detailed PERT network:

EVENTS (the beginning or end of an activity)
Circles, Ovals, Hexagons, Rectangles, Ellipses,
See page 37

ACTIVITIES (the tasks performed)
Arrows and Arrowheads, See page 17 and Trans-Pak catalog

CRITICAL PATH (line of activities requiring greatest total amount of time)

PERT COMPONENTS

TRANS-PAK

Pressure-Sensitive Die Cut Symbols

Trans-Pak offers a new, patented method for the application of pressure-sensitive die cut symbols. Just position, press and peel any one of a multitude of Trans-Pak symbols. Eliminate repetitive drawing. Save time by using the fast, accurate, distortion-free Trans-Pak method. Trans-Pak symbols reproduce crisp and clear through the diazo and/or photographic process.

Trans-Pak symbols combine readily with other Chart-Pak components. Symbols are available in many sizes, five base materials and 16 colors. Letters and numbers are also available. And there is NO DIE CHARGE for special symbols.

Many Trans-Pak Symbols are available for PERT Programming. Ask your dealer or write to Chart-Pak, Inc. for the new Trans-Pak catalog.

Symbols also available in colors
See Trans-Pak catalog.

SPECIAL PRINTED TAPES, SHEETS AND TITLE BLOCKS

Special Tapes, Sheets And Title Blocks

When you draw a special line or symbol more than once, it's time to think about Chart-Pak. Chart-Pak can pre-print any special pattern, any special title block, in any special color on any special pressure-sensitive base material. All we need is your original drawing.

Our artists and craftsmen can make up special tapes or templates, title blocks, colors or surfaces on any special pressure-sensitive base material. Or you can furnish the original artwork. It must, however, be of top quality. If you wish our artists to do the artwork, rates are \$5.00 per hour. The following information will be helpful in figuring your cost and the base material best suited for your specific need.

Special Printed Tapes

A 10-roll minimum order is required for any special printed configuration on Chart-Pak pressure-sensitive tape. Tapes are available in a variety of base materials (acetate fiber, matte acetate, acetate film, crepe paper, Paklon*) and colors. The clear, heat-resistant adhesive is perfect for diazo and/or photographic reproduction.

***3M Registered Trademark.**

How to Order Special Printed Tapes

For pricing, use Chart-Pak general catalog standard list price per roll for Transparent (T, TL) or Opaque tapes. To this, add a plate and set-up charge of \$20.00.
Example:

10 rolls 1/4" x 324"	\$1.25 per roll.....	\$12.50
Plate and set-up charge.....		20.00
	TOTAL	\$32.50

On reorders, the minimum quantity remains 10 rolls, but the set-up charge is dropped to \$15.00. On original orders of 50 or more rolls, the plate and set-up charge is eliminated. On special printed tape with a pattern printed to the edge so it can be slit below a 1/8" width, the minimum order is 35 rolls. List price becomes \$1.00 per roll, with a plate and set-up charge of \$15.00.

Special Slit Tapes

Chart-Pak will also precision-slit solid or patterned tapes to any special width. All special slitting will carry the price of the next standard width as shown in this catalog. Ten rolls or more are required for special slitting.

Special Printed Sheets

Special printed sheets available on pressure-sensitive MYLAR®, acetate, or paper can cut repetitive drawing time 50 to 90%. Can be reproduced by diazo or photographic process. Special colors can also be obtained on a custom order basis.

Special templates can be printed and die-cut on pressure-sensitive and heat-resistant Transmatte, clear or Matte-Tak Mylar®, Correction Paper or Opaque Template Sheet material.

*DuPont Registered Trademark

For a "quick quote" on Special Printed Sheets contact your local Chart-Pak dealer or write direct to Chart-Pak, Inc., Leeds, Mass.

Special Printed Title Blocks

Pre-printed title blocks may be ordered on clear or matte either right reading (applied on the face of tracing) or wrong reading (applied under the tracing). Heat-resistant adhesive will take diazo or photographic reproduction without damage. For pricing see the following table. **On a reorder there is no plate and set-up charge**, only a minimum order requirement of \$25.00.

Plastic Board Cleaner

Solution for cleaning Planning Boards,
Grid Sheets, Films.

No. 314 4 fl. oz. **75¢**

Chart-Pak Scalpel

Blade folds into handle.

No. 313 **35¢ ea.**

Chart-Pak "Stick Dot"

Clear cellophane $\frac{3}{4}$ " pressure-sensitive
"stick-dots" for fastening tracings to
drawing board — 250 dots per roll.

No. 329 **\$3.95/rl.**

Chart-Pak Safety Knife

For cutting wide tape. Plastic handle.
Retractable and replaceable blade.
Comes with blade.

No. 318 **35¢ ea.**

Chart-Pak Tape Cutter

Double beveled edge. Plastic. Cuts up
to 2" wide tape. Never damages base
material.

No. 317 **25¢ ea.**

Chart-Pak Frisket Knife

Easy to handle, $\frac{4}{8}$ " light-weight alum-
inum knife for precise and accurate
cutting. Especially useful in cutting
Shading film and Sheeted materials.
With removable blade.

No. 327 **25¢ ea.**

Desk Tape Holder

(Tapes Not Included)

Compact finished wood storage rack.
Perfect for desk or drawing board.
 $\frac{8}{8}$ " long. Keeps tapes handy and in
order.

No. 312 **\$1.00**

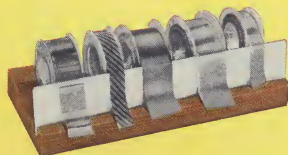

Chart-Pak Envelopes

Clear vinyl envelopes used to store
and protect Model A and E Planning
Boards.

No. 315A (21" x 33") **\$3.00 ea.**

No. 315E (11" x 17") **\$1.00 ea.**

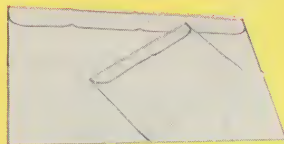

Chart-Pak Chisel

For easy removal of tapes and tem-
plates. Plastic, beveled edge.

No. 319 **50¢ per pkg. of 6**

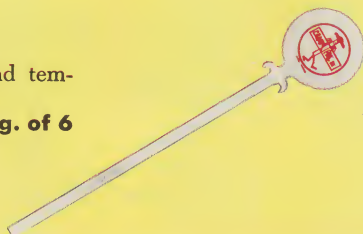

CHART-PAK ACCESSORIES

Correction Paper

Opaque, pressure-sensitive ledger paper. For prepar-
ing corrections of copy, title blocks, headings and
legends for charts, graphs, etc. for photographic re-
production.

No. 20PW 4" x 6" Pack of 20 sheets **\$1.00**

No. 21PW 9½" x 13½" Pack of 20 sheets **\$4.00**

Opaque Template Sheets

For making equipment and machine templates, etc.
Opaque, pressure-sensitive plasticized sheets. Non-
curling. Ruled 12 x 12 lines per inch, $\frac{1}{4}$ " lines ac-
cented. For photographic reproduction.

No. U3-O Sheet size 6½" x 8½" Pack of 12
sheets **\$1.75**

Grid area 6" x 8"

Same without printed grid

No. U4-O Sheet size 6¾" x 9½" Pack of 12
sheets **\$1.75**

Transparent Template Sheets

For making machine and equipment templates, etc.
Transparent, pressure-sensitive plastic sheets. Non
curling. Printed ruled 12 x 12 lines per inch, $\frac{1}{4}$ "
lines accented. For diazo or reproduction.

No. U3-T Sheet size 6¾" x 9½" Pack of 12
sheets **\$1.75**

Grid area 6" x 8"

Transmatte Non-Printed

For making machine and equipment templates, etc.
Non-curling, transparent, pressure-sensitive plastic
sheets. For diazo or reproduction.
